

Office 2007/2010 New Features

- Audience** This course is appropriate for those who have taken the level one course for each application or have at least one year of experience with the features of Microsoft Office 2000/XP/2003 and Windows and want to learn the differences between these applications and Microsoft Office 2007/2010.
- Description** This course uses a combination of lecture and hands on guided instructions to familiarize students with the "common" differences between Office 2000/XP/2003 and Office 2007/10. The focus is to give an overview of the differences that are similar in all Office 2010 applications, so that these do not have to be explained in each individual application differences course. The topics covered include: common new features, as well as specific Word, Excel, PowerPoint and Outlook new features.
- Objectives** Upon successful completion of the course, students should be able to:
- Common**
- Explain the purpose for the user interface redesign
 - Effectively share files with previous versions of Office
 - Use and customize the Quick Access Toolbar
 - Use and customize (in 2010) the Ribbon to access commands
 - Use the *File tab to display the Backstage view to control document files and set program options
 - Display the Mini Toolbar and use it for frequently used formatting commands
 - Apply and create new customized gallery options
 - Use the dialog box launchers to display dialog boxes for more control over results
