

# PowerPoint 2007/2010 Creating a Basic Presentation

<b>Audience</b>	This course is appropriate for those who are familiar with the personal computer and Windows. No previous knowledge of PowerPoint or presentation/graphics programs is required.
<b>Description</b>	The course uses a combination of lecture and hands-on practice (with independent exercises after class) to familiarize students with the PowerPoint program. Creating a presentation is covered by developing a single case study presentation. Students create and edit text slides, format the presentation with the Slide Master, use the PowerPoint views to rearrange the presentation, add graphics and Clip Art to slides, and present a slide show.
<b>Objectives</b>	Upon successful completion of the class, students should be able to: <ul style="list-style-type: none"><li>■ Create a new presentation and open an existing one</li><li>■ Create title and content slides</li><li>■ Save and close a presentation</li><li>■ Edit text slides</li><li>■ Use the slide master</li><li>■ Use spell check in the presentation</li><li>■ Move and copy text within the presentation</li><li>■ Modify the slide master</li><li>■ Apply Themes</li><li>■ Insert and modify pictures and Clip Art</li><li>■ Add SmartArt to a slide</li><li>■ Add drawings such as circles, lines, and boxes</li><li>■ View the presentation in different ways</li><li>■ Add notes to the presentation</li><li>■ Print slides, notes pages, the presentation outline, or handouts</li><li>■ Prepare a slide show using transitions and animation effects</li><li>■ Give a slide show</li></ul>
